

LMS-LEARNING AND MANAGEMENT SYSTEM

Pathfinder as part of the YUVAA program has developed a virtual training platform called TOSS (Training Online for Scale and Sustenance) where people can learn at their own pace using technology.

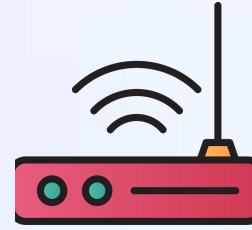

Yuvaakaars are field-based social entrepreneurs who do outreach intervention communication and provide family planning counseling which is gender transformative and also make contraceptives and other health products available at the doorstep of young married couples & first-time parents.

The YUVAA LMS is designed in a way that it can cater to all needs of Yuvaakaars using modern technology and applications specially to help them acquire technical knowledge and soft skills required to deliver quality family planning services to the community.

Key Features of YUVAA LMS

Self and Flexible Learning

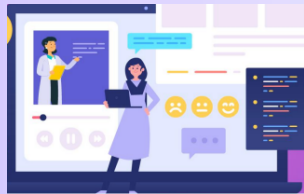

Online/Offline Mode

E-learning Management

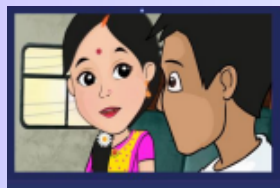

Responsive Design

Gamified Learning and Knowledge Assessment

Localization

Animated Videos

Certificate of Course Completion

Advanced Learning

User Friendly Navigation
